For programs 1-4 I did not use any outside resources and didn't think that there was any logic needed that we didn't learn either in class or through the readings. I also completed the convert age extra credit without any extra help. For the overdue tax extra credit, I used the website programiz.com to learn about the decimal rounding ability of the round function. I also used this website to learn about the format function which allowed me to have two numbers after the decimal place.
